Profile

Second-year B.Tech Computer Science Engineering student with hands-on experience in software development, problem-solving, and building real-world applications. Strong foundation in programming fundamentals, collaborative project work, and system design thinking. Seeking a Software Engineering Internship through Microsoft Explore to learn across roles, grow technically, and contribute to impactful products.

Education

Bachelor of Technology (B.Tech) in Computer Science Engineering

Second Year Undergraduate

Expected Graduation: 2028

Senior Secondary (Class XII)

Science Stream (PCM)

Completed: 2024

Technical Skills

Programming Languages: C++, Python, Java (Basics)

Core CS: Data Structures and Algorithms (Foundational), Object-Oriented Programming, Logical Problem Solving

Web & Tools: HTML, CSS, Git, GitHub, REST API Basics

Platforms: Google Colab, Microsoft Azure (Basics), Figma

Soft Skills: Team Collaboration, Clear Communication, Problem Analysis, Adaptability, Time Management, Willingness to Learn

Projects

EduPulse AI – Smart Education Support Platform

- Built a technology-assisted platform to support teachers and parents with academic workflows.
- Implemented features such as automated answer evaluation, question paper generation, attendance tracking, and student progress dashboards.
- Focused on transparency, human oversight, and responsible system design.
- Designed and iterated dashboards using Figma with emphasis on usability and clarity.

Smart Bus Tracking & Safety System

- Developed a bus tracking solution to improve safety and flexibility for school and college transportation.
- Enabled dynamic pickup location updates for students.
- Integrated RFID-based ID card system for students without smartphones.
- Implemented SMS alerts to notify parents and school authorities with real-time location updates.

Online Voting Management Platform (Academic Project)

- Designed a basic digital voting management system as part of a science project.
- Implemented secure vote recording and result aggregation concepts.
- Focused on transparency, correctness, and fair result computation.

Experience & Activities

Microsoft Imagine Cup – Student Innovator

- Worked on a technology-driven solution aligned with responsible and inclusive innovation.
- Collaborated with teammates to design, prototype, and present a functional solution.

Accenture Innovation Challenge 2024 – Team: TrackTech Innovators

- Built and presented an AI-assisted solution addressing real-world mobility challenges.
- Gained experience in ideation, prototyping, and technical presentation.

Smart India Hackathon (SIH) 2025 – Participant

- Participated in national-level hackathon focused on problem-solving and innovation.
- Worked in a team environment under time constraints to design feasible solutions.

Technical Event Organizer & Coordinator

- Organized and managed multiple college-level technical and innovation events.
- Coordinated teams, handled logistics, and ensured smooth execution of events.

Science Carnival – Lead Coordinator

- Lead coordinator for a science and technology exhibition organized in collaboration with college and state-level institutions.
- Managed student teams, project evaluations, and event operations.

Certifications & Achievements

- Introduction to Cybersecurity – Cisco Networking Academy
- Technical and Innovation Workshops – College Level
- Certificate of Leadership – Science Carnival (State / College Level)
- 3rd Rank – Science Project Exhibition (Voting Management Platform)
- Participation Certificates – Hackathons and Innovation Challenges

Interests

Software Engineering, AI for Education, Product Development, Problem Solving, Team Collaboration, Learning New Technologies
